The Blue Series is the longest serving series, defining a traditional Japanese scissor, and for very good reason. This classic cutting tool is forged from the highest grade steel, VG-10W, with hollow, mirror-polished, fully convex, honed edged blades, creating a razor like edge ideal for slicing. The simple adjustable flat-heat screw system allows for easy tension adjustments, making it a classic favourite. Available in both straight and offset.

SILVER SERIES The extremely attractive and sleek lined Silver series has a very offset design for optimum ergonomics. This is a scissor for those who want their creativity to flow. The fully hollow convex mirror-polished blades are forged from ATS314 carbon steel, making them extra hard wearing due to the added cobalt and the matrix structure of the steel. The flat centre screw system comes with an adjustable key for that optimum tension control.
