JACKSON POTTERY

Friends,

It's a brave, new world. In 2021, we saw rapidly expanding sales coupled with the challenge of supply chain interruptions. In response, Jackson Pottery has taken steps to position ourselves to help you exceed your goals in 2022. We've ordered early and ordered deep with our best-selling merchandise to serve you throughout the entire season. We have new offerings in smalls, terracotta, and glazed that will give your customers something to talk about this year.

Our incredible product offerings and programs are the best in the business for glazed assortments. We're also thrilled to provide extensive selections through our independent sales representatives and distributor partners. Find our newest and most current product offerings by visiting our website ordering portal. For an online account, send us an email at sales@jacksonpottery.com or call us at (877) 533-7687 today!

Thank you for the opportunity to bring you the *Best in Class* pottery and planters for 2022. We look forward to hearing from you!

With Gusto,

Forrest Jackson
CEO

Leadership Team: (L to R) Nigel Williams – Operations Mgr, John Copeland – Accounting Mgr, Forrest Jackson – CEO, Dave Oram – Executive Vice President, Dustin Sample – National Sales Director

JACKSON POTTERY + TINY HEARTS OF HOPE

We have partnered with our friends at Tiny Hearts of Hope in Vietnam to "speak up for those who have no voice and protect the rights of the poor and needy."

- **Orphan Care** – caring for abandoned or fatherless children.
- **Education** – creation/distribution of material on human trafficking.
- **Medical Mercy Missions** – giving medical care to those in need.
- **Community Development** – clean water sanitation/education.
- **Hope House** – A house of hope set up for women and children in distress. You can feed a child living here for about \$1.00 per day.

Jackson Pottery is committed to leaving a handprint of kindness on the lives of the less fortunate. **A portion of the proceeds goes toward helping the underprivileged** in the very country from which we import our beautiful Designer Glazed pottery line.

Thank you for being a part of something great in the lives of others.

OUR DISTRIBUTOR PARTNERS

Jackson Cast Stone is the premier cast stone division of Jackson Pottery, Inc. For over 20 years, we have been designing and manufacturing cast stone planters. We pour our full effort into every design and casting. We are inspired by our customers to bring you the latest trends in the most creative ways. Our passion and our purpose is to help you win by providing “Best in Class” concrete planters for your landscape designs.

Our company and our planters are strong to the finish... *Built steadfast.*

Visit us online to see our full line of products, colors, and finishes.
www.jacksoncaststone.com

10 colors, including grey and integrals • 2 finishes and 2 sealer options • 6,000 PSI average mix design • Made in the U.S.A.

Why do business with us?

- Every year we travel the world looking for new design trends that will make the biggest impact on your business.
- We inventory over \$2.5 million of designer pottery to be a reliable partner for you.
- With over 30 years in retail sales, we understand your customer.
- We absolutely stand behind the quality and service we provide.

B2B ORDERING PORTAL

Designer Glazed

There is a timeless effect to Designer Glaze. Your customers have been buying it for years, and the trend continues. Innovative designs and the strongest, most durable clay in the business, this collection is a must have for anyone selling pottery in their store or engaged in landscape design. We develop new designs every year and aren't afraid of trying new, strong statement pieces, so that you are armed with what you need to make a big splash every season. We love it. Your customers will too.

- Dense Vietnamese clay for maximum strength
- High fired up to 1200°C in wood burning dragon kiln
- Glazing increases durability and weatherproofing
- Over 20 unique colors

Rustic Glazed

We know you need BIG POTS. That's what this line is all about. Really. Getting a consistent color in this line is like nailing jelly to a tree - and we like it that way. Each piece is a true work of art, and no two planters are alike. Perhaps I should repeat that. Only in our Rustic Glazed line would a color like "yellow-orange" be acceptable. Well, if you are adventurous, or if you are just looking for some divergent color selection, trying some Rustic Glazed is a good move. Extra-large planters available in wild, wood-fired finishes. Not for the faint of heart.

- Strength and durability with desirable larger sizes
- High fired up to 1200°C in wood burning dragon kiln
- Specialized firing process creates unmatched coloration

Italian Terracotta

Every company needs an industry standard line. For over 30 years, Jackson Pottery has celebrated the durability and dependability of our original terracotta offerings. It's abundantly clear: the Italians have it down. How do you produce the same clay pottery for so many years without diminishing the impact of its earthy red finish that is so desired by... well... almost everybody? Often duplicated in style, but never in quality, it brings us great pleasure to continue to be a preferred supplier of these traditional designs, year after year. Machine made with real Italian clay. Long-lasting, dramatic beauty.

- Authentic Italian terracotta clay
- High quality clay, machine made consistency
- Breathable, porous earthenware

Tuscan Terracotta

If ever there were a line of pottery that excites Bob Jackson, it's the Handcrafted Italian line. For him and many others, the nostalgia is tangible. Originally purchasing a Dallas-based Italian terracotta warehouse in 1983, we are proud to continue on with the same traditional styles that got us started. Stocking Handcrafted Italian for trade and specialty dealers to buy as needed was the model, and it led to our more than seven acres of inventory from all over the world.

- Authentic Italian Galestro clay
- Extraordinary color and durability
- High fired up to 1000°C
- Breathable, porous earthenware

Asian Terracotta

Traveling about four hours from the bustle of Ho Chi Minh City down to the lower region of the river country was an experience in and of itself. Heavily influenced by the French, but seemingly years behind the development of Saigon, these factories preserve the old ways. Each planter is manufactured with a hand-packed mold and fired with rice husks at high temperatures. Lightweight clay with a traditional flare.

- Vietnamese clay from the Mekong River Delta
- Fired in traditional beehive kilns at up to 900°C
- Breathable, porous earthenware

Will hold a standard 100 ft. garden hose.

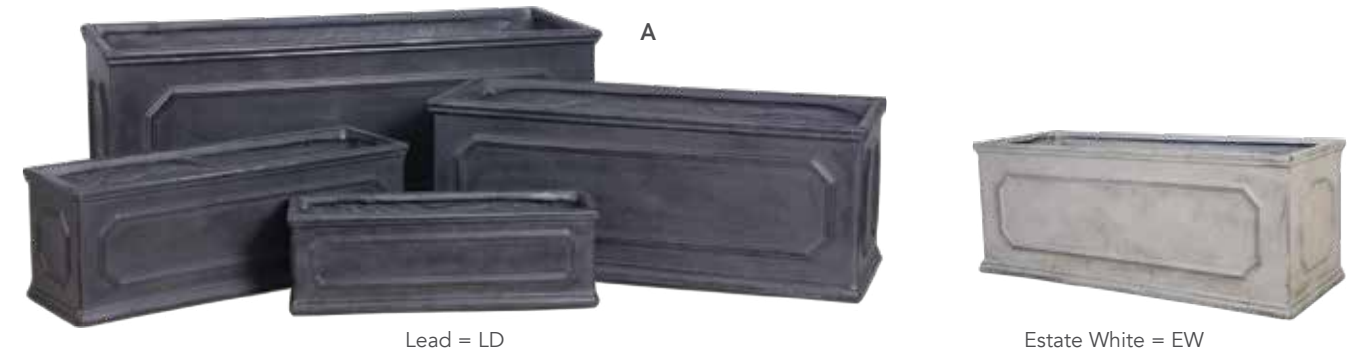

Lightweight

"We're really looking for something lightweight." We hear that often at trade shows or on the phone from customers. Fiber-reinforced earthenware allows for the lightweight properties, while keeping the offering sophisticated and specialized. For some of our garden centers, these planters make up a large percentage of their container sales. If your customers are looking for lightweight products, great options abound.

- Versatile, lightweight, low maintenance
- Fiberglass and Fiber Stone options
- Modern and traditional styles, six colors

Indoor Planters

The tide has turned, and everyone has seemed to notice. You can find very few millennial garden shoppers who aren't flocking to the indoor plant section. You will need a good selection, if you are going to keep their attention. It's not just millennials, however. The trend toward sharp, indoor pottery continues to add profit dollars to almost every garden center in the US market. There are more than a few great sellers in this section. Try a few or try many. You'll be glad you did, and so will your customers!

- SmallCrete
- Floral Glazed

Fountains

For us, a landscape job just doesn't seem complete without water. There is a rejuvenating property that comes with its motion and tranquility. Choose one of our self-contained styles and just add water. Peruse our catalog for our larger planters. See one you like? We're happy to make a fountain out of any planter we sell. Bury them in the ground or hoist them to a rooftop patio. Pre-plumbed upon request.

- Self-contained fountains are easy to set up and display
- Meridian pump included in kit assembly
- Fountain Installation Guide

Make it a Fountain!

How to choose the perfect pot to make a fountain.

Can any pot be made into a fountain?

Yes. Any pot or planter can be made into a fountain. However, there are certain shapes, styles, and textures that are better choices for fountains.

While there are many excellent options, the "vase" shaped styles are often the best choice for the traditional look. Tapered cones and squares lend themselves to the contemporary look.

Throughout the catalog, we've indicated our recommended styles with this icon . While these are just a few options, ultimately, beauty is in the eye of the beholder, and we encourage creativity... *Be creative, be bold!*

How do I pick the basin and pump size?

For basin selection, we recommend these general guidelines:

- For fountain pots with an Outer Diameter or Width (OD/W) of less than 16", use the 30" Round Fountain Basin, FBA-DFR-1.
- For fountain pots with outer diameters between 17" – 28", use the 36" Round Fountain Basin, FBA-DFR-X.
- For fountain pots with outer diameters between 29" – 40", use the 44" Square Fountain Basin, FBA-DFS-3.

Determining the pump size can be a little tricky, but we are here to help. While some like a small, calming, peaceful plume and spill, others like a high gusher with lots of sound. Since it often amounts to personal preference, please contact our office, and we'll help you determine the right size pump for your needs.

See page 127 for basin and pump options.

How many bags of river pebbles will I need?

This depends on the basin size and the base diameter size of the fountain pot.

We recommend the following guidelines:

- 3+ bags for a 30" Round Basin
- 4+ bags for a 36" Round Basin
- 5+ bags for the 44" Square Basin

Keep in mind that the above bag amounts will only cover the basin. More pebbles will be needed to cover surrounding areas or beds. See page 126 for river pebble options.

How do I plumb the fountain pot using the connection kit?

You can certainly do this yourself using the instructions on page 129, but we will pre-plumb it for you and ship the fountain pot ready for installation, all with no extra charge. Almost all customers request the pre-plumbing on fountain pots. Just remember to request the "pre-plumb" on your order.

Who do I call if I still have questions?

Please contact our office, and we'll be happy to help you with any questions or concerns.

Instructions for Jackson Pottery Disappearing Fountain Installation

1. Select a decorative planter and an adequate size basin for overflow of water. Jackson Pottery currently offers 30" and 36" round basins and a 44" square basin.

2. Dig hole for the basin. Define the required hole diameter for your basin by marking the outside soil. Then dig hole at a depth not to exceed the bottom of the outer lip. (Do not bury the basin all the way to the top of the lip or debris will enter the basin over time.) Tamp soil so that bottom of hole is compact. While not absolutely necessary, it is recommended to also add a tamped layer of crushed gravel or decomposed granite. Ensure that the dug out hole bottom is level.

3. Place basin in hole and insert center cone. Place heavy duty plastic top (for DFR-1 and DFS-3) or top pie pieces (for DFR-X) in place. In some cases, it may be necessary to cut additional holes in the top grate when designing a fountain setup that includes multiple vessels. For large vessels and fountain pots that will hold extreme amounts of water and weight, it is recommended to add additional supports around the center support cone of the basin. Cinder blocks or cut pieces of large diameter PVC pipe are suitable.

4. Drill a hole in the center of the planter. Using a 1.5" diamond hole saw drill bit, drill a hole in the center of the bottom of the planter. To keep the bit from overheating, use small amounts of water to keep it cool while in use. Be careful not to push too hard, as this may end up damaging the planter. Let the drill bit do most of the work. If necessary, patch any other existing drain holes with a hydraulic water stop cement.

5. Connect the tubing. Connect tubing from connection setup to male adapter with PVC cement or another strong, water tight epoxy (customer provided). Let this cure for appropriate amount of time indicated. Connect ball valve (flow regulator) and second piece of pipe on top of the first pipe, which is attached to male adapter.

6. Insert and seal male adapter. Seal outer rim of male adapter with silicone sealer (customer provided) and insert male adapter (now attached to the piping) inside the top of the planter and down through hole. Apply a generous amount of silicone sealer between the bottom

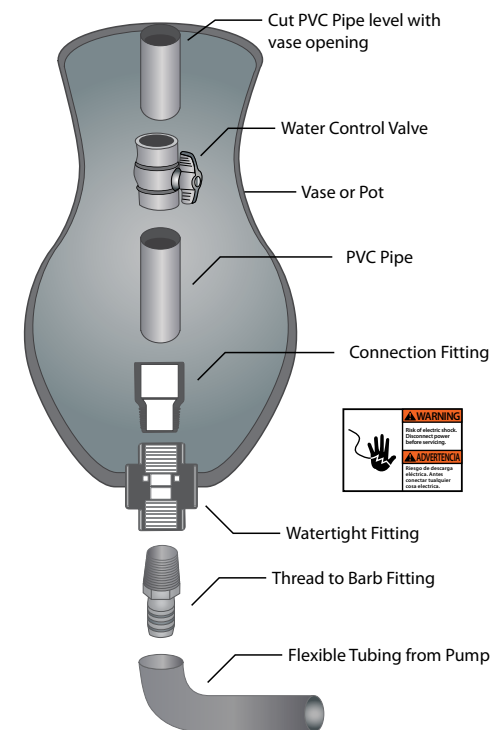

female coupling and the bottom of the jar. Screw female coupling over the male adapter until it makes a watertight seal. Let this dry for approximately 60 minutes or as directed on silicone packaging.

7. Connect the flexible tubing. Cut protruding pipe approximately 3-4 inches below the surface of the top opening of the planter. Connect flexible tubing to bottom of piping and insert this down through the hole in the plastic grate as second person tilts the water feature up on top of the center support.

8. Attach the pump. Reaching through the basin door, pull flexible tubing toward the opening where you are ready to attach the pump. If necessary, use additional hose clamp to ensure a tight connection from flexible hose to the pump. Insert pump into basin and run electrical cord out over the side of basin through the notch provided in the cover plates.

Level the top of the fountain pot to ensure an even water flow over the rim when filled. (It may be necessary to insert small shims under the base to achieve level.)

9. Test water flow. Fill basin and planter with water and test the flow rate. Adjust pump and/or ball valve to achieve desired water action. Cover top grate with decorative rocks, glass, or sea shells to create a beautiful water feature.

Caution: Never allow water pump to run dry. Drain all fountains during winter months to prevent damage from excessively cold conditions.

Color Wheel... for the win

Look no further than nature to find winning combinations in both colors and textures. The color wheel is a handy tool that designers and artists have been using since Sir Isaac Newton created the first one in 1708. Newton's theories on color were based in mathematics, but thankfully we won't need any formulas today. **Creating an energetic, peaceful, or tranquil arrangement is as easy as reading a color wheel.** Think of it as your cheat sheet. Here are a few of the simplest and most popular color combos that can easily be applied when choosing your planter and the plants to go with it.

Complimentary

Sitting directly across from one another on the color wheel, these two colors together create a look that is both vibrant and high contrast. This is a great way to draw attention to an area.

Split Complimentary

This is often a go-to combo due to its ease of use. As a variation of the Complimentary scheme, choose your base color along with the two colors adjacent to its complement.

Analogous

These colors sit next to each other on the color wheel. This is a great way to create a tranquil and peaceful space.

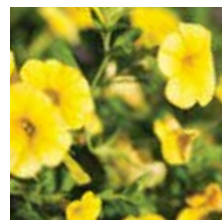

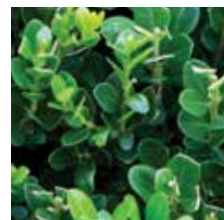

Triad

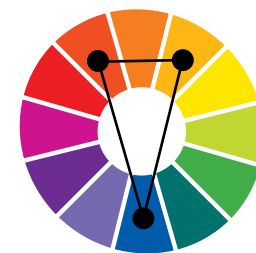

Place a triangle over the color wheel to find three colors that are evenly spaced. This lively combo will energize any space.

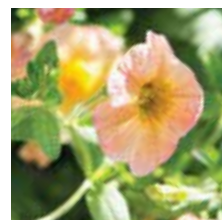

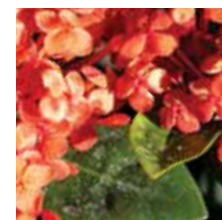

Analogous

NEW Ordering Portal | Shop by color, size, and style

We find that many of our customers use color as a starting point when narrowing down their pottery choices. From there, they use size and shape to help arrive at their final decision. Our new ordering portal makes this process even easier.

Utilizing the search function on our website, you can quickly narrow your options by color, size, and style. Choose familiar colors, like Falling Blue or Storm Grey, or use a more generic term to see more variations, like Blue. Continue narrowing down by size and shape, and what you're left with is a highly specific list of pottery that is tailored to your needs.
