Story

For over 40 years, SPI Gallery artists have created some of the finest solid brass sculptures. Inspired by the beauty of the natural world from the plains of the vast Serengeti to the depths of the mighty Pacific Ocean and everywhere in between, our collection of brass wildlife and nautical creations is simply unmatched. Valued by art collectors and prominent interior designers throughout the world, SPI Gallery creations are sure to impress even the most discriminating individuals. All pieces are designed by artists in our Northern California studios. Each piece is meticulously hand-sculpted and cast in our own foundry, creating a truly unique work of art to be treasured throughout the years.

Artisans sculpt the mold in clay.

Pouring molten brass into a mold.

Welding the artwork together.

Applying our hot patina finish.

Imperial Finish

Our imperial finish is carefully hand painted on brass, followed by a proprietary lacquer formula and many hours of hand polishing. This finish imparts a coppery glow and deep sheen that looks extraordinary in the light.

Hot Patina Finish

Each SPI Gallery art work starts its life as a clay sculpture, and is then cast in brass using the lost wax technique (the same method used in casting fine jewelry) for unparalleled dimensional detail. The sculpture is then meticulously hand finished using our proprietary hot patina finishes.

Our patina artists heat the brass surface with blow torches and apply secret formulations of chemicals that react to the metal using various techniques, one layer at a time. Several coats of hand waxing result in a vibrant, deep, layered finish with complex subtleties that no other finishing method can achieve. Due to this hand crafted process no two sculptures are the same. Each piece is unique with its own colors. SPI Gallery's hot patina finish is beautiful to behold and is much sought after.

Retro Art Finish

This is the original SPI Gallery finish. Tried and true, for decades. This traditional museum look appears as though the seafare are swimming below the surface of the ocean. Reflections and contrasts appear and are accented by small brass highlights. Some of the pieces have larger brass highlights giving them an almost retro style.

Many of the sculptures are mounted to a green or black marble base for an elegant finishing touch. Your Gallery customers will want at least one of these pieces in their collection. This classic finish produces a truly beautiful work of art, the perfect addition to any home or yacht.

How We Work

SPI Gallery is a team of talented 2-D artists, sculptors, and craftsmen, inspired by the natural beauty that surrounds us and dedicated to expressing that beauty in extraordinary sculptures.

Each SPI Gallery original begins life as 2-D concept art designed by our team of talented artists in Northern California. Our master sculptors breathe life into the artwork with up to weeks of hand sculpting in modeling clay in our own atelier.

Each part is cast in our own foundry using either the lost wax or sand casting method. Artisans take the various cast parts and carefully weld them together. After several days of welding, sanding, and polishing, the metal sculpture takes its final form and the patina artists then have their turn.
